Calreticulin precursor - mouse
N;Alternate names: 55K calcium-binding reticuloplasmin; calregulin
C;Species: Mus musculus (house mouse)
C;Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 10-Sep-1999
C;Accession: S06763; JC1444; PC1233; A57498

Sy1343
calreticulin precursor - Korean frog)
C;Species: Rana rugosa (Korean frog)
C;Accession: S1343
R;Yamamoto, S.; Nakamura, M.
FEBS Lett. 387, 27-32, 1996
A;Ftle: Calnexin: its molecular cloning and expression in the liver of the frog, Rana r
A;Recence number: S71343
A;Recession: S71343
A;Status: nucleic acid sequence not shown
A;Accession: S71344
A;Status: nucleic acid sequence not shown
A;Accession: S71345
A;Cross-references: EMBL:D78589; NID:g1514956; PIDN:BAA11425.1; PID:g1514957
C;Superfamily: calreticulin
C;Keywords: calcium binding: endoplasmic reticulum
F;1-18/Domain: signal sequence #status predicted <AAT>
F;205-213/Region: nuclear location signal
F;415-418/Region: endoplasmic reticulum retention signal

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 8, Ag

Sequence 8, Application US/09459066
Patent No. 6187909
GENERAL INFORMATION:
APPLICANT: Spridgs, Melanie
TITLE OF INVENTION: VIRAL ENCODED SEMAPHORIN PROTEIN
TITLE OF INVENTION: RECEPTOR DNA AND POLYPEPTIDES
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC COMPALIBLE
OPERATING SYSTEM: MS-DOS/Windows 95
SOFTWARE: Word for Windows 95, 7.0a
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/09/458,791
                                                                                                                                                                     FILING DATE: 10-Dec-1999
CLASSIFICATION: <Unknown>
PRIOR APPLICATION NUMBER: 08/958,598
FILING DATE: 28-0CT-1997

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

N.Alternate names: calcium-binding protein 3

S.Specials: Rattus norvedgicus (Norway rat)

C.Specials: Rattus norvedgicus (Normay rat)

C.Specials: Rattus (Normay rattus)

R.Natmura, M.; Normay M.; Baba, T.; Michikawa, Y.; Yamanobe, T.; Arai, K.; Okinaga, S.

Exp. Cell Res. 205, 101-110, 1993

A.Fitle: An endoplasmic reticulum protein, calreticulin, is transported into the acrosom A.Reference number: A49176; MUID:93202172

100059 Total number of hits satisfying chosen parameters:

Minimum DB seq length: 0 Maximum DB seq length: 2000000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

SwissProt_39:* Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

-!- FUNCTION: THIS PROTEIN BINDS CALCIUM. THERE ARE BOTH HIGH AND LOW APPINITY CALCIUM-BINDING SITES.
-!- SUBUNIT: MONDAR (BY SIMILARITY).
-!- SUBCELLULAR LOCATION: ENDOPLASMIC RETICULUM LUMEN.
-!- SIMILARITY: BELONGS TO THE CALRETICULIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ;
